DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to an inner box for a cooker, classified in class 219, subclass 400.
- II. Claims 6-7, drawn to a method of integrating an inner box, classified in class 426, subclass 523.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process/method and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process/method as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process/method. (MPEP § 806.05(e)). In this case the method claimed can be practiced by another and materially different apparatus without the specifics of the Group I apparatus, i.e. opening portion, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
